

IMPROVED SKIRT TECHNOLOGY FOR TWINLINE

TWINLINE's new, improved skirt technology provides even more possibilities.

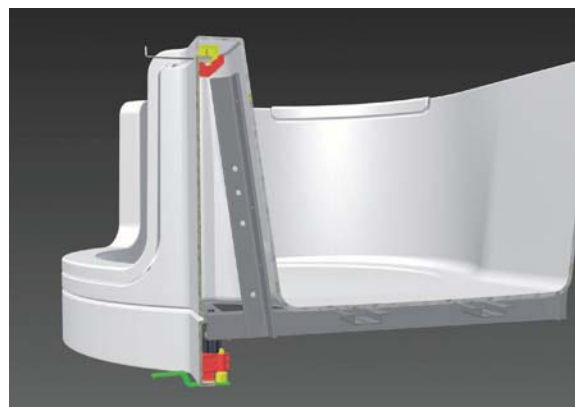

Through an innovative fastening system the Twinline skirt can be easily adjusted and fastened from the outside. An additional joint moulding masks the skirt gap and provides an elegant appearance with no joints.

The new technology not only facilitates Twinline assembly, it also provides additional stability to the skirt against effects of external impact. At the same time the skirt supports the bathtub edge during use.

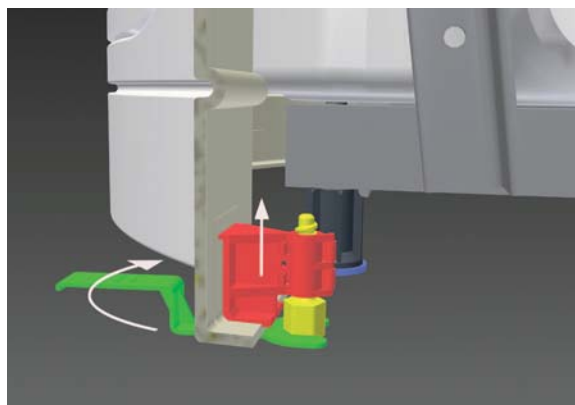

In addition the new skirt technology enables attractive extensions to the assortment: White plastic tub skirts as well as tub skirts made of printed genuine glass in the colours Clear glass, Anthracite and Bordeaux offer an especially elegant eye-catcher in the bath.
